Biophysical Chemistry

Author Index to Volume 54 (1995)

Ädelroth, P., see Brzezinski, P. (54) 191
Ahluwalia, J.C., see Gopal, S. (54) 119
Alaeddine, S., Andreasson, H., Larsson, M. and Nygren, H.
Discontinuous formation and desorption of clusters during particles adsorption at surfaces (54) 211
Altekar, W., see Ebel, C. (54) 219
Andreasson, H., see Alaeddine, S. (54) 211
Antonini, G., see Malatesta, F. (54) 1
Aradi, F.
Effect of methylation on the pyrimidine–pyrimidine stacking interaction studied by ^{1}H NMR chemical shift (54) 67
Ascenzi, P., see Casale, E. (54) 75

Bakkali, A., see Brass, O. (54) 83
Bakovic, M. and Dunford, H.B.
Pre-steady-state kinetics and modelling of the oxygenase and cyclooxygenase reactions of prostaglandin endoperoxide synthase (54) 237
Balliano, G., see Casale, E. (54) 75
Barth, C., Bihler, H., Wilhelm, M. and Stark, G.
Application of a fast charge-pulse technique to study the effect of the dipolar substance 2,4-dichlorophenoxyacetic acid on the kinetics of valinomycin mediated K^+-transport across monoolein membranes (54) 127
Bayer, P., see Leibrock, E. (54) 175
Bayol, A., Dupin, P., Boe, J.F., Claudy, P. and Létoffé, J.M.
Study of pH and temperature-induced transitions in urate oxidase (Uox-EC1.7.3.3) by microcalorimetry (DSC), size exclusion chromatography (SEC) and enzymatic activity experiments (54) 229
Benegas, J.C., see Van den Hoop, M.A.G.T. (54) 35
Bicknese, S., Zimet, D., Park, J., Van Hoek, A.N., Shohet, S.B. and Verkman, A.S.
Detection of water proximity to tryptophan residues in proteins by single photon radioluminescence (54) 279
Bihler, H., see Barth, C. (54) 127
Boe, J.F., see Bayol, A. (54) 229
Bolognesi, M., see Casale, E. (54) 75
Borowski, E., see Mazerski, J. (54) 49
Brass, O., Letoffé, J.M., Bakkali, A., Bureau, J.C., Corot, C. and Claudy, P.
Involvement of protein solvation in the interaction between a contrast medium (iopamidol) and fibrinogen or lysozyme (54) 83
Brown, G.C.
Rate control within the Na^+/glucose cotransporter (54) 181
Brunori, M., see Malatesta, F. (54) 1
Brzezinski, P., Sundahl, M., Ädelroth, P., Wilson, M.T., El-Agez, B., Wittung, P. and Malmström, B.G.
Triplet-state quenching in complexes between Zn–cytochrome *c* and cytochrome oxidase or its Cu_A domain (54) 191
Bureau, J.C., see Brass, O. (54) 83

Carrero, J., Jameson, D.M. and Gratton, E.
Oxygen penetration and diffusion into myoglobin revealed by quenching of zincprotoporphyrin IX fluorescence (54) 143
Casale, E., Collyer, C., Ascenzi, P., Balliano, G., Milla, P., Viola, F., Fasano, M., Menegatti, E. and Bolognesi, M.
Inhibition of bovine β-trypsin, human α-thrombin and porcine pancreatic β-kallikrein-B by 4′,6-diamidino-2-phenylindole, 6-amidinoindole and benzamidine: a comparative thermodynamic and X-ray structural study (54) 75
Cegielski, R., see Frackowiak, D. (54) 95
Chapados, C., Girard, D., Trudel, M. and Ringuet, M.
Separation of overlapping spectra from evolving systems using factor analysis. 3. Fluorescence spectra of hematoporphyrin IX di-n-propylether diethanolamide (54) 165
Choi, S. and Swanson, J.M.
Interaction of cytochrome *c* with cardiolipin: an infrared spectroscopic study (54) 271
Claudy, P., see Bayol, A. (54) 229
Claudy, P., see Brass, O. (54) 83
Collyer, C., see Casale, E. (54) 75
Corot, C., see Brass, O. (54) 83

Dunford, H.B., see Bakovic, M. (54) 237
Dupin, P., see Bayol, A. (54) 229
Dupont, G. and Goldbeter, A.
Erratum to "Protein phosphorylation driven by intracellular calcium oscillations: A kinetic analysis". [Biophys. Chem., 42 (1992) 257–270] (54) 291

Ebel, C., Altekar, W., Langowski, J., Urbanke, C., Forest, E. and Zaccai, G.
Solution structure of glyceraldehyde-3-phosphate dehydrogenase from *Haloarcula vallismortis* (54) 219
El-Agez, B., see Brzezinski, P. (54) 191
Enache, C., see Hörer, O.L. (54) 43

Fasano, M., see Casale, E. (54) 75

Biophysical Chemistry 54 (1995) 297–302

Biophysical Chemistry

Subject Index to Volume 54 (1995)

N-Acetyl-D-glucosamine
Binding constant; Thermal denaturation; Differential scanning calorimetry (DSC); Lysozyme (Gopal, S. (54) 119)

Actomyosin
ATP; Fluctuations; Myofibril; Sarcomere; Thermal noise (Honda, H. (54) 61)

Aggregation
Protein adsorption; Ferritin; Clusters (Alaeddine, S. (54) 211)

Amino acids
Protein solvation; Fibrinogen; Lysozyme and contrast medium interaction; Isothermal microcalorimetry; Differential scanning calorimetry; Raman studies (Brass, O. (54) 83)

Amphotericin B
Molecular dynamics simulations; Antifungal antibiotic; Solvation effects; Conformational changes; Structuring of water molecules (Mazerski, J. (54) 49)

Antifungal antibiotic
Molecular dynamics simulations; Amphotericin B; Solvation effects; Conformational changes; Structuring of water molecules (Mazerski, J. (54) 49)

Aqueous solution
Tripeptides; Heat capacity; Increment system (proteins); Density; Partial molar volume (Vogl, T. (54) 261)

Arachidonic acid
Prostaglandin endoperoxide synthase; Eicosadienoic acid; Pre-steady-state kinetics; Computer simulation (Bakovic, M. (54) 237)

ATP
Actomyosin; Fluctuations; Myofibril; Sarcomere; Thermal noise (Honda, H. (54) 61)

High pressure; Kinetics; Hydrolysis (Leibrock, E. (54) 175)

Bacteriorhodopsin
Phospholipid bilayer; Reconstitution; Detergent; Solubilization; Substitution (Ikematsu, M. (54) 155)

Bilayer model
Lateral diffusion coefficients; Lateral diffusion activation energy (Galle, J. (54) 109)

Binding constant
Thermal denaturation; Differential scanning calorimetry (DSC); N-Acetyl-D-glucosamine; Lysozyme (Gopal, S. (54) 119)

Bovine β-trypsin
Human α-thrombin; Porcine pancreatic β-kallikrein-B; 4′,6-Diamidino-2-phenylindole; Thermodynamics of serine proteinase:inhibitor complex; X-ray crystal structure (Casale, E. (54) 75)

Cardiolipin
Protein secondary structure; Phospholipid; Cytochrome *c*; IR spectroscopy (Choi, S. (54) 271)

β-Carotene
Chlorophyll *a*; Excitation energy transfer; Fluorescence; Nematic liquid crystal; Photoacoustic spectra; Polarized light (Frackowiak, D. (54) 95)

Celluloses
Conformational transition; Polyelectrolyte adsorption; Nucleic acids (Hörer, O.L. (54) 43)

Charge-pulse technique
Dipole potential; Ion carrier; Lipid membrane (Barth, C. (54) 127)

CHIP28
Tryptophan; Single photon radioluminescence; Fluorescence; Melittin; Water; Mathematical modeling (Bicknese, S. (54) 279)

Chlorophyll *a*
β-Carotene; Excitation energy transfer; Fluorescence; Nematic liquid crystal; Photoacoustic spectra; Polarized light (Frackowiak, D. (54) 95)

Clusters
Protein adsorption; Aggregation; Ferritin (Alaeddine, S. (54) 211)

Computer simulation
Prostaglandin endoperoxide synthase; Arachidonic acid; Eicosadienoic acid; Pre-steady-state kinetics (Bakovic, M. (54) 237)

Conformational changes
Molecular dynamics simulations; Antifungal antibiotic; Amphotericin B; Solvation effects; Structuring of water molecules (Mazerski, J. (54) 49)

Conformational transition
Polyelectrolyte adsorption; Nucleic acids; Celluloses (Hörer, O.L. (54) 43)

Cytochrome *c*
Electron transfer; Proton pump; Redox-linked; Electron gating; Zinc porphyrin (Winkler, J.R. (54) 199)

Protein secondary structure; Phospholipid; Cardiolipin; IR spectroscopy (Choi, S. (54) 271)

Cytochrome *c* oxidase
Metalloproteins; Electron transfer; Membrane proteins; Energy transduction (Malatesta, F. (54) 1)

Cytochrome oxidase
Zn–cytochrome *c*; Triplet state; Laser flash photolysis; Electron transfer (Brzezinski, P. (54) 191)

Density
Tripeptides; Aqueous solution; Heat capacity; Increment system (proteins); Partial molar volume (Vogl, T. (54) 261)

Detergent
Bacteriorhodopsin; Phospholipid bilayer; Reconstitution; Solubilization; Substitution (Ikematsu, M. (54) 155)

4′,6-Diamidino-2-phenylindole
Bovine β-trypsin; Human α-thrombin; Porcine pancreatic β-kallikrein-B; Thermodynamics of serine proteinase:inhibitor complex; X-ray crystal structure (Casale, E. (54) 75)

Dication
Porphyrin derivatives; Hematoporphyrin; Fluorescence; pH; pK_a; Free base; Monocation; Ionic species; Photodynamic therapy; Photochemotherapy (Chapados, C. (54) 165)

Differential scanning calorimetry
Protein solvation; Amino acids; Fibrinogen; Lysozyme and contrast medium interaction; Isothermal microcalorimetry; Raman studies (Brass, O. (54) 83)

Differential scanning calorimetry (DSC)
Binding constant; Thermal denaturation; N-Acetyl-D-glucosamine; Lysozyme (Gopal, S. (54) 119)

Differential scanning calorimetry
Urate oxidase; Thermal behavior; pH; Inhibitor interaction; Size exclusion chromatography; Enzymatic activity (Bayol, A. (54) 229)

Diffusion
Oxygen penetration; Myoglobin; Quenching; Zincprotoporphyrin IX fluorescence (Carrero, J. (54) 143)

Dipole potential
Ion carrier; Lipid membrane; Charge-pulse technique (Barth, C. (54) 127)

Eicosadienoic acid
Prostaglandin endoperoxide synthase; Arachidonic acid; Pre-steady-state kinetics; Computer simulation (Bakovic, M. (54) 237)

Electron gating
Electron transfer; Proton pump; Redox-linked; Cytochrome *c*; Zinc porphyrin (Winkler, J.R. (54) 199)

Electron transfer
Metalloproteins; Cytochrome *c* oxidase; Membrane proteins; Energy transduction (Malatesta, F. (54) 1)

Cytochrome oxidase; Zn–cytochrome *c*; Triplet state; Laser flash photolysis (Brzezinski, P. (54) 191)

Proton pump; Redox-linked; Electron gating; Cytochrome *c*; Zinc porphyrin (Winkler, J.R. (54) 199)

Emulsion stability
Surfactants; L-α-phosphatidylcholine; Sodium taurocholate (Fillery-Travis, A.J. (54) 253)

Energy transduction
Metalloproteins; Cytochrome *c* oxidase; Electron transfer; Membrane proteins (Malatesta, F. (54) 1)

Enzymatic activity
Urate oxidase; Thermal behavior; pH; Inhibitor interaction; Differential scanning calorimetry; Size exclusion chromatography (Bayol, A. (54) 229)

Excitation energy transfer
β-Carotene; Chlorophyll *a*; Fluorescence; Nematic liquid crystal; Photoacoustic spectra; Polarized light (Frackowiak, D. (54) 95)

Ferritin
Protein adsorption; Aggregation; Clusters (Alaeddine, S. (54) 211)

Fibrinogen
Protein solvation; Amino acids; Lysozyme and contrast medium interaction; Isothermal microcalorimetry; Differential scanning calorimetry; Raman studies (Brass, O. (54) 83)

Fluctuations
Actomyosin; ATP; Myofibril; Sarcomere; Thermal noise (Honda, H. (54) 61)

Fluorescence
β-Carotene; Chlorophyll *a*; Excitation energy transfer; Nematic liquid crystal; Photoacoustic spectra; Polarized light (Frackowiak, D. (54) 95)

Porphyrin derivatives; Hematoporphyrin; pH; pK_a; Free base; Monocation; Dication; Ionic species; Photodynamic therapy; Photochemotherapy (Chapados, C. (54) 165)

Tryptophan; Single photon radioluminescence; Melittin; CHIP28; Water; Mathematical modeling (Bicknese, S. (54) 279)

Force-flow relations
NMR; Oxidative phosphorylation; Non-equilibrium dynamics (Westerhoff, H.V. (54) 137)

Free base
Porphyrin derivatives; Hematoporphyrin; Fluorescence; pH; pK_a; Monocation; Dication; Ionic species; Photodynamic therapy; Photochemotherapy (Chapados, C. (54) 165)

Glucose transport
Metabolic control analysis; Rate-limiting step; Sodium transport (Brown, G.C. (54) 181)

Glyceraldehyde-3-phosphate dehydrogenase
Halophilic protein; Solution structure; Solvent interaction; Molar mass determination (Ebel, C. (54) 219)

pH
Porphyrin derivatives; Hematoporphyrin; Fluorescence; pK_a; Free base; Monocation; Dication; Ionic species; Photodynamic therapy; Photochemotherapy (Chapados, C. (54) 165)

Urate oxidase; Thermal behavior; Inhibitor interaction; Differential scanning calorimetry; Size exclusion chromatography; Enzymatic activity (Bayol, A. (54) 229)

Halophilic protein
Glyceraldehyde-3-phosphate dehydrogenase; Solution structure; Solvent interaction; Molar mass determination (Ebel, C. (54) 219)

Heat capacity
Tripeptides; Aqueous solution; Increment system (proteins); Density; Partial molar volume (Vogl, T. (54) 261)

Hematoporphyrin
Porphyrin derivatives; Fluorescence; pH; pK_a; Free base; Monocation; Dication; Ionic species; Photodynamic therapy; Photochemotherapy (Chapados, C. (54) 165)

Hetero-association
^{1}H NMR chemical shift; Stacking interaction; Methylation; Pyrimidine (Aradi, F. (54) 67)

High pressure
ATP; Kinetics; Hydrolysis (Leibrock, E. (54) 175)

^{1}H NMR chemical shift
Stacking interaction; Hetero-association; Methylation; Pyrimidine (Aradi, F. (54) 67)

Human α-thrombin
Bovine β-trypsin; Porcine pancreatic β-kallikrein-B; 4′,6-Diamidino-2-phenylindole; Thermodynamics of serine proteinase:inhibitor complex; X-ray crystal structure (Casale, E. (54) 75)

Hydrolysis
ATP; High pressure; Kinetics (Leibrock, E. (54) 175)

Increment system (proteins)
Tripeptides; Aqueous solution; Heat capacity; Density; Partial molar volume (Vogl, T. (54) 261)

Inhibitor interaction
Urate oxidase; Thermal behavior; pH; Differential scanning calorimetry; Size exclusion chromatography; Enzymatic activity (Bayol, A. (54) 229)

Intrinsic affinity
Voltammetry; Polyelectrolyte theory; Mixed-valency counterions system (Van den Hoop, M.A.G.T. (54) 35)

Ion carrier
Dipole potential; Lipid membrane; Charge-pulse technique (Barth, C. (54) 127)

Ionic species
Porphyrin derivatives; Hematoporphyrin; Fluorescence; pH; pK_a; Free base; Monocation; Dication; Photodynamic therapy; Photochemotherapy (Chapados, C. (54) 165)

IR spectroscopy
Protein secondary structure; Phospholipid; Cytochrome *c*; Cardiolipin (Choi, S. (54) 271)

Isothermal microcalorimetry
Protein solvation; Amino acids; Fibrinogen; Lysozyme and contrast medium interaction; Differential scanning calorimetry; Raman studies (Brass, O. (54) 83)

pK_a
Porphyrin derivatives; Hematoporphyrin; Fluorescence; pH; Free base; Monocation; Dication; Ionic species; Photodynamic therapy; Photochemotherapy (Chapados, C. (54) 165)

Kinetics
ATP; High pressure; Hydrolysis (Leibrock, E. (54) 175)

L-α-phosphatidylcholine
Emulsion stability; Surfactants; Sodium taurocholate (Fillery-Travis, A.J. (54) 253)

Laser flash photolysis
Cytochrome oxidase; Zn–cytochrome *c*; Triplet state; Electron transfer (Brzezinski, P. (54) 191)

Lateral diffusion activation energy
Bilayer model; Lateral diffusion coefficients (Galle, J. (54) 109)

Lateral diffusion coefficients
Bilayer model; Lateral diffusion activation energy (Galle, J. (54) 109)

Lipid membrane
Dipole potential; Ion carrier; Charge-pulse technique (Barth, C. (54) 127)

Lysozyme
Binding constant; Thermal denaturation; Differential scanning calorimetry (DSC); N-Acetyl-D-glucosamine (Gopal, S. (54) 119)

Lysozyme and contrast medium interaction
Protein solvation; Amino acids; Fibrinogen; Isothermal microcalorimetry; Differential scanning calorimetry; Raman studies (Brass, O. (54) 83)

Mathematical modeling
Tryptophan; Single photon radioluminescence; Fluorescence; Melittin; CHIP28; Water (Bicknese, S. (54) 279)

Melittin
Tryptophan; Single photon radioluminescence; Fluorescence; CHIP28; Water; Mathematical modeling (Bicknese, S. (54) 279)

Membrane proteins
Metalloproteins; Cytochrome *c* oxidase; Electron transfer; Energy transduction (Malatesta, F. (54) 1)

Metabolic control analysis
Rate-limiting step; Glucose transport; Sodium transport (Brown, G.C. (54) 181)

Metalloproteins
Cytochrome *c* oxidase; Electron transfer; Membrane proteins; Energy transduction (Malatesta, F. (54) 1)

Methylation
^{1}H NMR chemical shift; Stacking interaction; Hetero-association; Pyrimidine (Aradi, F. (54) 67)

Mixed-valency counterions system
Voltammetry; Polyelectrolyte theory; Intrinsic affinity (Van den Hoop, M.A.G.T. (54) 35)

Molar mass determination
Halophilic protein; Glyceraldehyde-3-phosphate dehydrogenase; Solution structure; Solvent interaction (Ebel, C. (54) 219)

Molecular dynamics simulations
Antifungal antibiotic; Amphotericin B; Solvation effects; Conformational changes; Structuring of water molecules (Mazerski, J. (54) 49)

Monocation
Porphyrin derivatives; Hematoporphyrin; Fluorescence; pH; pK_a; Free base; Dication; Ionic species; Photodynamic therapy; Photochemotherapy (Chapados, C. (54) 165)

Myofibril
Actomyosin; ATP; Fluctuations; Sarcomere; Thermal noise (Honda, H. (54) 61)

Myoglobin
Oxygen penetration; Diffusion; Quenching; Zincprotoporphyrin IX fluorescence (Carrero, J. (54) 143)

Nematic liquid crystal
β-Carotene; Chlorophyll *a*; Excitation energy transfer; Fluorescence; Photoacoustic spectra; Polarized light (Frackowiak, D. (54) 95)

NMR
Oxidative phosphorylation; Non-equilibrium dynamics; Force-flow relations (Westerhoff, H.V. (54) 137)

Non-equilibrium dynamics
NMR; Oxidative phosphorylation; Force-flow relations (Westerhoff, H.V. (54) 137)

Nucleic acids
Conformational transition; Polyelectrolyte adsorption; Celluloses (Hörer, O.L. (54) 43)

Oxidative phosphorylation
NMR; Non-equilibrium dynamics; Force-flow relations (Westerhoff, H.V. (54) 137)

Oxygen penetration
Diffusion; Myoglobin; Quenching; Zincprotoporphyrin IX fluorescence (Carrero, J. (54) 143)

Partial molar volume
Tripeptides; Aqueous solution; Heat capacity; Increment system (proteins); Density (Vogl, T. (54) 261)

Phospholipid
Protein secondary structure; Cytochrome *c*; Cardiolipin; IR spectroscopy (Choi, S. (54) 271)

Phospholipid bilayer
Bacteriorhodopsin; Reconstitution; Detergent; Solubilization; Substitution (Ikematsu, M. (54) 155)

Photoacoustic spectra
β-Carotene; Chlorophyll *a*; Excitation energy transfer; Fluorescence; Nematic liquid crystal; Polarized light (Frackowiak, D. (54) 95)

Photochemotherapy
Porphyrin derivatives; Hematoporphyrin; Fluorescence; pH; pK_a; Free base; Monocation; Dication; Ionic species; Photodynamic therapy (Chapados, C. (54) 165)

Photodynamic therapy
Porphyrin derivatives; Hematoporphyrin; Fluorescence; pH; pK_a; Free base; Monocation; Dication; Ionic species; Photochemotherapy (Chapados, C. (54) 165)

Polarized light
β-Carotene; Chlorophyll *a*; Excitation energy transfer; Fluorescence; Nematic liquid crystal; Photoacoustic spectra (Frackowiak, D. (54) 95)

Polyelectrolyte adsorption
Conformational transition; Nucleic acids; Celluloses (Hörer, O.L. (54) 43)

Polyelectrolyte theory
Voltammetry; Mixed-valency counterions system; Intrinsic affinity (Van den Hoop, M.A.G.T. (54) 35)

Porcine pancreatic β-kallikrein-B
Bovine β-trypsin; Human α-thrombin; 4′,6-Diamidino-2-phenylindole; Thermodynamics of serine proteinase:inhibitor complex; X-ray crystal structure (Casale, E. (54) 75)

Porphyrin derivatives
Hematoporphyrin; Fluorescence; pH; pK_a; Free base; Monocation; Dication; Ionic species; Photodynamic therapy; Photochemotherapy (Chapados, C. (54) 165)

Pre-steady-state kinetics
Prostaglandin endoperoxide synthase; Arachidonic acid; Eicosadienoic acid; Computer simulation (Bakovic, M. (54) 237)

Prostaglandin endoperoxide synthase
Arachidonic acid; Eicosadienoic acid; Pre-steady-state kinetics; Computer simulation (Bakovic, M. (54) 237)

Protein adsorption
Aggregation; Ferritin; Clusters (Alaeddine, S. (54) 211)

Protein secondary structure
Phospholipid; Cytochrome *c*; Cardiolipin; IR spectroscopy (Choi, S. (54) 271)

Protein solvation
Amino acids; Fibrinogen; Lysozyme and contrast medium interaction; Isothermal microcalorimetry; Differential scanning calorimetry; Raman studies (Brass, O. (54) 83)

Proton pump
Electron transfer; Redox-linked; Electron gating; Cytochrome *c*; Zinc porphyrin (Winkler, J.R. (54) 199)

Pyrimidine
^{1}H NMR chemical shift; Stacking interaction; Hetero-association; Methylation (Aradi, F. (54) 67)

Quenching
Oxygen penetration; Diffusion; Myoglobin; Zincprotoporphyrin IX fluorescence (Carrero, J. (54) 143)

Raman studies
Protein solvation; Amino acids; Fibrinogen; Lysozyme and contrast medium interaction; Isothermal microcalorimetry; Differential scanning calorimetry (Brass, O. (54) 83)

Rate-limiting step
Metabolic control analysis; Glucose transport; Sodium transport (Brown, G.C. (54) 181)

Reconstitution
Bacteriorhodopsin; Phospholipid bilayer; Detergent; Solubilization; Substitution (Ikematsu, M. (54) 155)

Redox-linked
Electron transfer; Proton pump; Electron gating; Cytochrome *c*; Zinc porphyrin (Winkler, J.R. (54) 199)

Sarcomere
Actomyosin; ATP; Fluctuations; Myofibril; Thermal noise (Honda, H. (54) 61)

Single photon radioluminescence
Tryptophan; Fluorescence; Melittin; CHIP28; Water; Mathematical modeling (Bicknese, S. (54) 279)

Size exclusion chromatography
Urate oxidase; Thermal behavior; pH; Inhibitor interaction; Differential scanning calorimetry; Enzymatic activity (Bayol, A. (54) 229)

Sodium taurocholate
Emulsion stability; Surfactants; L-α-phosphatidylcholine (Fillery-Travis, A.J. (54) 253)

Sodium transport
Metabolic control analysis; Rate-limiting step; Glucose transport (Brown, G.C. (54) 181)

Solubilization
Bacteriorhodopsin; Phospholipid bilayer; Reconstitution; Detergent; Substitution (Ikematsu, M. (54) 155)

Solution structure
Halophilic protein; Glyceraldehyde-3-phosphate dehydrogenase; Solvent interaction; Molar mass determination (Ebel, C. (54) 219)

Solvation effects
Molecular dynamics simulations; Antifungal antibiotic; Amphotericin B; Conformational changes; Structuring of water molecules (Mazerski, J. (54) 49)

Solvent interaction
Halophilic protein; Glyceraldehyde-3-phosphate dehydrogenase; Solution structure; Molar mass determination (Ebel, C. (54) 219)

Stacking interaction
^{1}H NMR chemical shift; Hetero-association; Methylation; Pyrimidine (Aradi, F. (54) 67)

Structuring of water molecules
Molecular dynamics simulations; Antifungal antibiotic; Amphotericin B; Solvation effects; Conformational changes (Mazerski, J. (54) 49)

Substitution
Bacteriorhodopsin; Phospholipid bilayer; Reconstitution; Detergent; Solubilization (Ikematsu, M. (54) 155)

Surfactants
Emulsion stability; L-α-phosphatidylcholine; Sodium taurocholate (Fillery-Travis, A.J. (54) 253)

Thermal behavior
Urate oxidase; pH; Inhibitor interaction; Differential scanning calorimetry; Size exclusion chromatography; Enzymatic activity (Bayol, A. (54) 229)

Thermal denaturation
Binding constant; Differential scanning calorimetry (DSC); N-Acetyl-D-glucosamine; Lysozyme (Gopal, S. (54) 119)

Thermal noise
Actomyosin; ATP; Fluctuations; Myofibril; Sarcomere (Honda, H. (54) 61)

Thermodynamics of serine proteinase:inhibitor complex
Bovine β-trypsin; Human α-thrombin; Porcine pancreatic β-kallikrein-B; 4′,6-Diamidino-2-phenylindole; X-ray crystal structure (Casale, E. (54) 75)

Tripeptides
Aqueous solution; Heat capacity; Increment system (proteins); Density; Partial molar volume (Vogl, T. (54) 261)

Triplet state
Cytochrome oxidase; Zn–cytochrome *c*; Laser flash photolysis; Electron transfer (Brzezinski, P. (54) 191)

Tryptophan
Single photon radioluminescence; Fluorescence; Melittin; CHIP28; Water; Mathematical modeling (Bicknese, S. (54) 279)

Urate oxidase
Thermal behavior; pH; Inhibitor interaction; Differential scanning calorimetry; Size exclusion chromatography; Enzymatic activity (Bayol, A. (54) 229)

Voltammetry
Polyelectrolyte theory; Mixed-valency counterions system; Intrinsic affinity (Van den Hoop, M.A.G.T. (54) 35)

Water
Tryptophan; Single photon radioluminescence; Fluorescence; Melittin; CHIP28; Mathematical modeling (Bicknese, S. (54) 279)

X-ray crystal structure
Bovine β-trypsin; Human α-thrombin; Porcine pancreatic β-kallikrein-B; 4′,6-Diamidino-2-phenylindole; Thermodynamics of serine proteinase:inhibitor complex (Casale, E. (54) 75)

Zinc porphyrin
Electron transfer; Proton pump; Redox-linked; Electron gating; Cytochrome *c* (Winkler, J.R. (54) 199)

Zincprotoporphyrin IX fluorescence
Oxygen penetration; Diffusion; Myoglobin; Quenching (Carrero, J. (54) 143)

Zn–cytochrome *c*
Cytochrome oxidase; Triplet state; Laser flash photolysis; Electron transfer (Brzezinski, P. (54) 191)
